REP. JOEL T. BROYNHILL

'61 To Be Biggest Ever'

By REP. JOEL T. BROYNHILL
(R. - 10th District Va.)

During the recent campaign I had the opportunity to see at first hand the tremendous growth that has taken place in Northern Virginia.

Along with thousands of new homes, the many new shopping centers and office buildings indicative of current growth, are massive new centers of future employment such as the Central Intelligence Agency and the Dulles International Airport, as well as a vast complex of new highways.

IN THE year 1961 some of the impact of these new centers will begin to be felt; and this impact will be added to the forces which

have been contributing to the rapid development of the post war years.

All in all I expect 1961 to be one of the biggest years ever. Although other areas of the country may experience some degree of recession, I don't believe it will be felt in Northern Virginia.

THE TREMENDOUS growth we are experiencing presents a great challenge to the citizens of the area and to their elected and appointed officers.

To control and channel development along healthy and progressive lines, I believe that the good sense of the citizens and the ability and dedication of the public servants of the area will produce this happy result.
